Global Perspective.

We invest across a globally diverse set of asset classes seeking to uncover the most attractive investment opportunities.

Long-Term Approach.

A long-term approach allows us to take advantage of temporarily mispriced investments and helps ensure that fundamentals, rather than fear or greed, dictate investment decisions.

Forward-Looking Analysis.

History provides a valuable frame of reference but does not always apply to the current environment. We seek to learn how the world is evolving and incorporate our opinions about these changes into our assessment of risk and investment allocations.

Discipline and Conviction.

We set the bar high in assessing investment opportunities, and we have the discipline and conviction to act on an opportunity we find compelling. We believe that investors who lack the courage to act on their convictions are destined for mediocrity.

Innovative Thinking.

Our willingness to think outside the box allows us to identify unusually compelling investment opportunities. This has been an important part of our competitive edge and our long-term success.

Broad Access to Talent: “Manager of the Managers.”

Our reputation in the investment community provides us with unique access to investment talent from outside firms, via mutual funds and private investment vehicles, allowing us to incorporate a high level of expertise in a variety of asset classes that would otherwise not be available from a single firm. We are continuously evaluating the managers we’ve selected in order to ensure our clients are benefiting from the best talent available.

OUR PROVEN APPROACH TO INVESTING IS DECEPTIVELY SIMPLE

- 1. Establish a strategic asset allocation for each risk-based portfolio*
- 2. Pursue highly compelling tactical opportunities*
- 3. Select managers with an identifiable and sustainable competitive edge*

A Range of Risk-Defined Strategic Allocations

12-Month Target Maximum Downside Loss Thresholds

Though Litman Gregory attempts not to exceed the loss threshold, losses sometimes exceed the threshold in a 12-month period. Though we don't believe it is likely this maximum loss threshold would be breached in a typical market cycle, losses in excess of the threshold do occur, and significant breaches of this loss threshold can be expected during extreme bear markets. The above allocations represent our strategic portfolio weightings. Strategic allocations vary by platform.
